

MAGNA~CHLOR

SALTWATER CHLORINATORS

A high performance salt chlorination system that produces crystal clear pool water.

MAGNA~CHLOR

S A L T W A T E R C H L O R I N A T O R S

The MAGNA-CHLOR salt chlorinator is available in two models, STANDARD (Non self cleaning cell - AC Models) and REVERSE POLARITY (Self cleaning - RP Models). The reverse action de-scales the build up of calcium and reduces electrode cleaning maintenance by 95%.

The high performance salt chlorination system produces crystal clear pool water. It is safe, clean and is ideal for people with eye, ear and skin allergies when using conventional chlorine. At only 1/7th the salinity of sea water, the pool water has a soft feel which is ideal for people suffering from these problems.

The salt chlorinators carry a 3 year warranty when installed on a domestic swimming pool. The ideal salt solution in the pool for these chlorinators is 5000ppm. Chlorinator should be run - Summer (6-12hrs), Autumn (4-6hrs), Winter (2-4hrs). Low running costs from 1-3¢ (cents) an hour depending on the model chosen.

The MAGNA-CHLOR salt water chlorinators are supplied with:

- ✓ An electronic sensing switch.
- ✓ Variable chlorine output control.
- ✓ Circuit breaker overload protection.
- ✓ Automatic overload, protects power supply from over salting.
- ✓ Automatic low salt warning light flashes if salt falls below the correct level.
- ✓ The salt cell is very efficient and accessible when maintenance is required.
- ✓ Computerised automatic control & display system.
- ✓ New, clear, rectangular cell housing, with plated electrodes.

MODEL	AC15/RP15	AC20/RP20	AC25/RP25	AC35/RP36	AC50/RP50
COOL CLIMATES Cubic Metres (Litres)	60 - (60,000)	80 - (80,000)	120 - (120,000)	180 - (180,000)	200 - (200,000)
